

# Business – IT Transformation

Delivering business value

The year to think differently...

KavvY IT Consulting LLP Gurgaon India

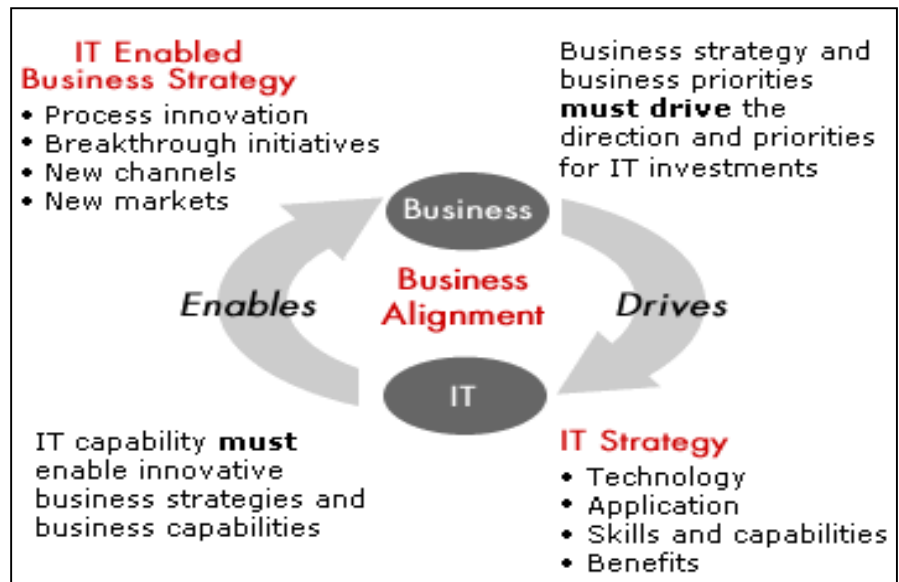

## Business Paradigm Evolution

**KavvY** provides **Strategic Business consulting leveraging IT for transforming businesses**. KavvY aligns with its clients as partners to conceptualize as well as realize technology driven business transformation. **KavvY** provides end-to-end business solutions that leverage technology and also provides solutions for prevalent dynamic environments where in businesses as well as technological strategies converge. Business now-a-days require maximum flexibility, speed, and efficiency, where-in a robust IT strategy is critical. **KavvY** on an ongoing basis helps businesses leverage their strength by improving the overall IT environment and by reviewing IT strategy, providing process study, process improvements, process automation, automation environment review, system integration solutions, application development and biz management services.

**KavvY** adopts a specialized technique for identification of constraints i.e. Review of Total Constraints (**ROTC**) thru a set process of Theory of Constraints (**TOC**) for an efficient and better use of IT systems to get maximum business mileage. Thus a planned process is taken up to settle constraints for the business benefits. This will open the flood gates for the business and help cross the unseen boundaries, resulting in smooth working with improved business effectiveness.

The evolving business and technology landscape requires organizations to be agile and flexible to react swiftly to the changing environment. Building the right strategy and selecting the best technology to keep pace with new business trends and technological advancements can help these organizations ensure faster business results and remain ahead of their competition. Leveraging deep industry and technological knowledge, **KavvY** helps enterprises transform the way companies do business by optimizing business processes, aligning IT with the business needs, supporting IT operations and designing effective risk management strategies. **KavvY** ensures enterprises benefit from faster business results and reduced operational risks.

## Strategic Business Consulting Leveraging IT for Transforming Businesses - services

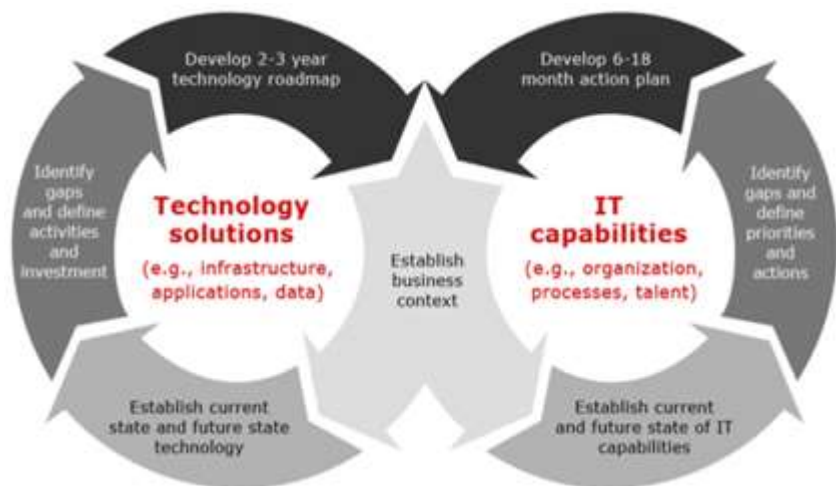

- Strategic Business and IT Transformation Consulting
  - Business IT transformation to grab opportunities of a growing market place - **BUST**
  - Review, strategize and optimize the IT usage – **REVIEW** or **ROTc**
  - Review and rework the IT road map with the defined mile stones to achieve it – **RESTART**
- Assist new overseas companies to get established in and around New Delhi, India - **ASSIST**

**Business and IT transformation to grab opportunities of a growing market place - BUST:** The transformation is commonly adopted by organizations these days and in true sense it is a means to re-energize the establishment as well as its people with rightly improving on constraints, resetting the direction and rewiring the technology to keep on moving with fresh enthusiasm. In this process a real soul searching takes place eliminating inefficiencies and tuning or tweaking approaches taking into account new challenges as well opportunities which as a result gives a better work environment and new directions with full zeal.

### **Review, Strategize and optimize the IT usage – REVIEW or ROTc:**

The review process starts with the Review of Total Constraints (**ROTc**) thru a set process of Theory of Constraints (**TOC**) for an efficient and better use of IT systems to get maximum business mileage. Recap the IT strategy adopted so far and work out the lessons learnt in the

journey with insight of what significant or insignificant is achieved rather than more could have been achieved. This has opened a way that the roadmap to be effective in a better way. This assures a better value for money already spent and encourages all concerned to move better aligned with a much better confidence. This primarily comprises of identifying gaps in the better utilization of IT assets and suggests remedies to fill them for an efficient use.

**Review, strategize and rework the IT road map with the defined mile stones to achieve it - RESTART:** A thorough review of the road map if already available is must and then to rework the approach for a fresh roadmap that has to be taken up. The key process task is to engage IT stakeholders at first place and then the end users in the review process and work out the road ahead. The **ROTc** is by default is applicable here. As our approach is to work as an extension of clients and leave most of expertise with clients' itself playing as an advisory role only. This

primarily comprises of working an IT road map in the changing business scenario and fast evolving business environment.

**Assist new overseas companies to get established in and around New Delhi, India - ASSIST:** We have experts with a broad based industry exposure to assist startups from India as well as overseas in & around NCR in various ways including various logistics aspects from start to take off and looking at various aspects of footprint including office space, various approvals & registrations, human resources, recruitments assistance and many more. Here again we work as an extension of the client to help them set up their operations. Our value based and ethical approach will assure clients' full confidence and help them move fast in their mission of establishing operations in India. These are the valued clients whom we would further focus on real IT consulting services and these would be our value long term business partners.

## About KavvY

**KavvY** had been in existence for about a decade by now in one way or the other. The idea of **KavvY** was to take off pain of IT and business leaders working alongside them to bring in a 360 degree shift. We are primarily into **Business Consulting leveraging IT for transforming businesses**. There has to be adaptability, alignment, agility and sustenance built around systems that will keep an organization always live or alive rather to say younger ever with full of zeal to stand in this **competitive** world and stronger enough to keep striving ways ahead with vigor as well as with energy as ever therefore **transformation** becomes a key in a right way.

We had been tweaking our approach with a focus to fill gaps specifically in SME backed up with highly experienced people of the industry as leaders. There was a need for more pragmatic, service focused and IT consulting providers who are willing to partner and grow with businesses taking on a role of a trusted business advisor. Since 2012 till now **KavvY** worked with many SME clients around the globe in all industries to fill that gap required to transform businesses as well as revitalize IT. When it comes to transforming businesses or taking an open innovation model for the business transformation, one size does not fit all. It is a task to take a right model that really works best and delivers the utmost for the organization. The organization need to think about **Constraints**, Improving business processes to win over **constrains**, **remodeling** the business in the changing business environment and **rewiring** the technology for its optimum utility.

**KavvY** aims at all times to maintain the upmost trust worthy services to our customers and strives to place itself at the forefront of **Business Consulting** leveraging IT for **transforming** businesses with improved business impact as well as with the higher IT utility. The strategy is to arouse and utilize human energies in a defined manner to make IT an agile and sustainable entity, considering that human beings are still the best resources for an organization. This is very important that these valuable resources are rightfully engaged. The best and sustainable impact could be best achieved by harmonizing human energies which could be done in several and in very unique ways. In our services offering the harmonizing human energies, occupies a very significant space keeping technology in a right prospective as an integral part of any business.
